Session 18: Free Will

Summary: Discussion about free will and freedom. “You speak of being free as though you are separate. Freedom seems to imply for you that you are unattached to other energies is big, freedom from attachments is freedom to be influenced by other forces of the universe? This course this is almost impossible. It seems that there is not from my perspective much difference between the two freedoms in that we normally see freedom as or myself as a control over my my own interactions within other energies, knowing that there will always be the other energy there, but that I am not maneuvered are swayed beyond my own.” … You have freedom to choose your reaction to your own past and your reaction to any event in the present.
